

MAYANK VERMA

Kota, Rajasthan, India

+91-9460400248 | mayank.msverma@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

Education

Indian Institute of Information Technology, Kottayam (IIITK)

Aug 2023 – Apr 2027

B.Tech in Computer Science and Engineering (Expected April 2027)

Kerala, India

• CGPA: 8.9/10.0

Technical Skills

Expertise: Full-Stack Development, Backend Systems, Blockchain, DevOps

Languages: Java, TypeScript, Python, JavaScript, C++, SQL, R

Frontend: Next.js, React.js, Tailwind CSS, Three.js, Socket.io

Backend: FastAPI, Node.js, Express.js, GraphQL

Databases & ORM: MySQL, MongoDB, PostgreSQL, Supabase, NeonDB, Prisma

Tools & DevOps: Git, Docker, Kubernetes, Linux, Postman, AWS (S3, EC2, VPC), GCP

Libraries: NumPy, pandas, Matplotlib, scikit-learn

Work Experience

OT Security Huddle | [Recommendation Letter](#)

September 2025 – March 2026

Web Development Intern | Remote

Bangalore, Karnataka, IN

- Revamped [otsechuddle.com](#) and built *OT Career Compass* — Gemini API tool assessing profiles against IEC 62443 & NIST 800-82, recommending OT roles with downloadable roadmaps; 320+ submissions at 97.5% plan generation rate.
- Built *OT Cyber Dome* — Three.js 3D quiz simulating defense of 6 IEC 62443 security layers across 3 difficulty tiers; Supabase role-based auth, admin analytics dashboard; 79 attempts at 92% pass rate.
- Architected [otsec.academy](#) — production LMS with course/module/lesson management, SHA-256 hashed certificates, quizzes, flashcards, and Razorpay gateway (Indian & international); 256 users, 29 enrollments, 3 live courses.

Projects

Origyn – Blockchain Document Verification | [GitHub](#)

Feb 2025 – Mar 2025

- *Tech Stack:* Python, FastAPI, Next.js, TypeScript, PostgreSQL, Redis, Docker, Nginx, Cloudflare R2
- Systems lacked cryptographic integrity, enabling silent post-upload tampering; designed a SHA-256 + Merkle tree pipeline on a custom blockchain across a 6-service Dockerized architecture with stateless FastAPI backends — tamper detection without third-party chain dependency.
- No operational visibility risked undetected abuse; engineered WebSocket + Redis Pub/Sub admin monitoring, Nginx rate limiting (5 req/s upload, 30 req/s API), and Google/GitHub OAuth — fully integration-tested, shared Redis state eliminating single points of failure.

Nexus – Agile Project Tracker | [GitHub](#) | [Live](#)

June 2025 – July 2025

- *Tech Stack:* Next.js, TypeScript, Tailwind CSS, Redux Toolkit, Node.js, Express.js, JWT, Nodemailer, MongoDB
- Teams lacked a secure agile platform with verified access; built RESTful APIs with JWT authentication incorporating refresh token rotation and OTP-based email verification via Nodemailer — preventing unauthorized account creation at the entry point.
- State complexity across Kanban, issue tracking, and member assignment risked inconsistent UI; architected a responsive Next.js frontend with Redux Toolkit for predictable global state — live at [mayanknexus.app](#).

Pluto – AI-Powered Frontend Builder | [GitHub](#)

Jan 2026 – Feb 2026

- *Tech Stack:* Next.js, TypeScript, Tailwind CSS, NeonDB, Prisma, Clerk Auth, Clerk Billing, E2B Sandbox, Inngest, Gemini API
- Repetitive boilerplate had no reliable path to production-ready components from natural language; engineered a Gemini API platform generating responsive React components inside isolated E2B sandboxes — cutting boilerplate time by 60% across 8+ templates.
- Uncontrolled generation requests risked abuse and blocked monetization; built a tiered credit system via Clerk Billing tracked in Prisma/NeonDB — 5 free generations, 100 pro with seamless upgrades, serving 50+ active users since launch.

Achievements & Certifications

Open Source Contributions

July 2025 – November 2025

GirlScript Summer of Code & Social Summer of Code

- Merged 8 PRs across AI-integrated MERN applications contributing UI components and frontend improvements — GSSoC 2025 ([Certificate](#)) and SSoC 2025 ([Certificate](#)).

Machine Learning Foundations | [View Badge](#)

July 2025

Amazon (AWS Educate)

LeetCode & Competitive Programming

2024 – Present

- Actively solving daily on LeetCode — 304+ problems solved (115 Easy, 156 Medium, 33 Hard) in Java and Python; earned 100 Days Badge 2024 for sustained consistency.
